EDUCATION

PhD Engineering Mathematics, University of Bristol Bristol, United Kingdom 2021 ▸ 2025 (Anticipated)

Department of Engineering Mathematics and Bristol Robotics Laboratory

EPSRC funded PhD, supervised by Prof. David Barton and Prof. Nathan Lepora.

Research Theme: Towards real-world dexterous manipulation with tactile sensing using physics-based simulators and sim-to-real deep reinforcement learning.

MEng Aeronautical Engineering, Imperial College London London, United Kingdom Sep 2015 ▸ Jun 2019

Department of Aeronautics

Integrated Master's Degree. Obtained 1st Class Honours. Result: 77%

Thesis: "Optimal Control and its Role in Cancer Treatment" supervised by Dr. Thulasi Mylvaganam.

WORK EXPERIENCE

Teaching Assistant, University of Bristol Jan 2022 ▸ Now

- Assisted in Applied Statistics and Further Computer Programming units; coordinated lab sessions and was responsible for supervising and evaluating final projects.
- Co-supervised Msc projects in physics-based simulation for dexterous manipulation, visuotactile manipulation, and additional summer projects in RL for tactile robotics.
- Prepared and showcased robot manipulation demonstrations during university open days.

Research and Development Engineer, Sagentia Innovation Sep 2019 ▸ Sep 2021

- Implemented vision models (Mask R-CNN and U-Net) for agricultural navigation and vine detection.
- System identification and tuning of high-precision surgical motor.
- Full stack development of emotion detection web app.
- Demonstrated expertise in conducting market research, capturing requirements, and effectively planning and executing technical projects.

Undergraduate Assistant, Imperial College London Jan 2019 ▸ May 2019

- Provided support during Computing labs to ensure smooth lab operations.

Research and Technology Summer Intern, Airbus Jun 2018 ▸ Sept 2018

- Investigated the application of predictive maintenance for the latest A350 aircraft, examining the current data transmission pipeline and performing feasibility analysis.

Conference and Workshop Presentations

Generalizable and Robust Tactile Pushing using Sim-to-Real Deep Reinforcement Learning
ICRA 2023 Vitac Workshop June 2023

Vision and Tactile Pose Identification for Picking a Target without Collision
ICRA 2023 Vitac Workshop June 2023

Robust Goal-Conditioned Tactile Pushing using Deep Reinforcement Learning
The 4th UK Manipulation Workshop Jan 2023

Professional Services

Robotics: Reviewer of ICRA (2024), RA-L (2023), IROS (2023)

Relevant Projects

General In-hand Object Rotation with Tactile Sensing

- Investigating the advantages of rich tactile feedback for in-hand object rotation via precision grasps, utilizing the allegro hand equipped vision-based tactile sensors.

Deep Reinforcement Learning for Goal-Conditioned Tactile Pushing

- Application of model-based and model-free reinforcement learning for long-horizon goal-conditioned object pushing with touch.

Robosoft 2023 Manipulation Competition: Integrated System for Robot Food Handling

- Led the development of vision-tactile robotic system to perform food pick-and-place and pouring tasks.

Final Year Project: Optimal Control for Cancer Treatment

- Designed an optimal control algorithm to optimize the delivery of chemotherapy during cancer treatment using a mathematical model of tumor growth and its response to treatment.

Awards and Honors

EPSRC Doctoral Training Partnership PhD Studentship 2021-2025
Imperial Aeronautics Scholar 2017
Ian Ross Scholarship for STEM Undergraduate Students 2016

Skills

Programming Language:	Python, C/C++, C#, MATLAB and Simulink
Software:	Pytorch, TensorFlow, Git, ROS, IsaacGym, Pybullet, Unity3D
Research Interest:	Reinforcement Learning, Optimal Control, Dexterous Manipulation, Tactile Sensing, Sim-to-Real Transfer
Language:	English, Mandarin
